DETAILED ACTION

Receipt is acknowledged of the after-Final Amendment filed August 4, 2004.

Allowable Subject Matter

Claims 1-19 are allowable over the prior art of record.

The following is an examiner's statement of reasons for allowance: Although, Tominaga et al. (A Network Architecture with Distributed Switching Function for Optical Fiber Links, Proceedings Computer Networks COMPCON 82 Fall, September 1982, pp. 478-483) discloses a star repeater architecture comprising data exchange modules and logic gate, Tominaga et al. differs from the present claimed invention because, among other things, Tominaga et al. pertains to a logical configuration of the star repeater whereas the present claimed invention pertains to having a signal preparation circuit positioned between the logic gate and the second input of the data exchange modules for the purpose of adjusting the output signal of the logic gate to a pulse form. Accordingly, one of ordinary skill in the art would not have been motivated to modify the teachings of Tominaga et al. to meet the claimed limitation as set forth in the present claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
